Air-Ag Manufacturing has designed and manufactured this new type tail fork unit which is completely interchangeable with your standard unit you now have. It is so designed that you simply remove your standard Stearman knuckle and install the new fork unit in its place. You can use either steerable or locking set-up by installing long splined shaft extension for steerable or short splined shaft extension for locking. The 2024-T4 aluminum anodized axle is so designed that you can use your standard 10:00 tail wheel you now have, and also a special seal unit for the small bearing end of wheel. The upper unit that bolts on fork is made of 4130 Condition "N" chrome moly steel and heat treated. The fork is 2024-0 aluminum and heat treated to "T4" condition after forming. The greatest advantage to this unit is to stop the excessive shimmy on the tail wheel by putting more caster on the tail unit. We now have more than 100 of these units being used by our customers with complete satisfaction.

STEARMAN AIRFRAME PARTS

Tail Wheel Assembly & Parts

NEW TYPE STEARMAN TAIL FORK & AXLE FOR 12½" WHEEL

We have designed and manufactured this unit for the Stearman operator working off extra rough strips and who needs the larger tail wheel tire. This unit, as is the 10:00 fork unit, is completely interchangeable with your standard unit you now have and can be used steerable or locking. The 2024-T4 anodized aluminum straight axle is designed to use the 12½ x 4½ tail wheel assembly using Timken 07100 tapered roller bearings and with a steel nut and special washer. The upper steel spindle unit is the same one used on the 10:00 fork assembly and the 12½" fork is 2024-0 aluminum, heat treated to "T4" condition after forming. As we stated, this unit works exceptionally well on extra rough strips and also helps to prevent the tail wheel shimmy. We have around 70 of these units in use now, with approximately half of these in the rice country of South Louisiana and Southeast Texas. Our customers tell us the units are doing the job they were designed for.

FAA-PMA APPROVED

AG-52903M12
TAIL FORK ASSY.
Complete As Shown
$998.25

Replacement parts listed on next page
